

ICT Tools Used By the Teachers for Effective Teaching-Learning Process

1. To help the students learn more, apart from text books and classroom lectures, teachers are made to use the Smart Classroom to disseminate the course content through video clippings and PowerPoint presentations. The smart classroom has WiFi connectivity, an LCD projector, a laptop and other audio peripherals.
2. Teachers use ICT tools for record keeping, lesson plan construction, basic information search on the internet, online survey of students' feedback, etc. For this purpose a desktop is installed on the lecturers' common room with internet connection.
3. All the teachers make use of ICT tools for conduct of virtual/online classes. Various smartphone apps and computer softwares such as Google Meet, Google Sheets, Google Forms, Google Drive, Microsoft Teams, etc. are used for this purpose. Study materials are also made available to the students through the use of ICT tools.
4. The teachers are well equipped with basic knowledge for operating on Microsoft Office softwares. In addition to that the teachers also attend seminars and workshops relating to the usage and applicability of multimedia softwares.
